ABOUT US

DECADES OF EXCELLENCE IN THE DESIGN, MANUFACTURE AND SERVICING OF SPECIALITY FRAME, DOOR AND WINDOW ASSEMBLIES

As a world-class manufacturer of specialized frame, door and window assemblies, AMBICO supports wholesale distribution across our full line of products. Our sales team, including independent local representatives offers technical support and professional expertise from project concept to substantial completion. Our five-year warranty is a reflection of our product quality and business credibility.

*Recessed Panel Steel Doors
Bronx Community College*

*Blast Resistant Door & Frame
West Point Military Academy*

*Bronze Clad Doors & Frame
Victory Building*

Our product list includes custom-built, engineered, and decorative assemblies. AMBICO's engineered frames, doors and windows are tested at renowned independent laboratories complying with the highest performance standards in the industry. Discerning architects and engineers rely on AMBICO to design and build frames, doors and windows suitable for their state-of-the-art buildings; our products are also found in iconic buildings around the globe.

AMBICO's decorative frames, doors and windows combine craftsmanship with durability, strengthening architecturally unique projects with exclusive, custom-made designs that enhance heritage property restorations as well as exciting new projects for private or public use.

OUR STORY

AMBICO was founded in 1955 by two brothers-in-law, Israel Shinder and Emanuel Lightstone. The family-owned business grew into an industry-leading, specialized door and window company with a worldwide reputation for quality and integrity. Our founder's demonstrated foresight and flexibility by predicting economic trends. Their effects on the construction sector have led AMBICO to focus on the decorative and engineered frame, door and window products that are our company's hallmark.

AMBICO has solidified its reputation for excellence under our current President, Jack Shinder, the son of co-founder Israel Shinder, and Vice-President Judah Silverman, the son-in-law of co-founder Emanuel Lightstone. Senior staff have graced the company with their drive for excellence for five to forty years.

Jack Shinder
President of AMBICO

OUR FAMILY

Judah Silverman
Vice President of AMBICO

Today, AMBICO is an internationally trusted frame, door and window manufacturer for governments, institutions, and private companies that require state-of-the-art performance. Key clients have included such government agencies as The U.S. Army Corps of Engineers (USACE), the U.S. Department of Defense (DoD), and Canada's Royal Canadian Mounted Police (RCMP); educational institutions like Massachusetts Institute of Technology (MIT) and the University of California, Berkeley; and such internationally successful firms as Pfizer Inc., Apple Inc., and British Petroleum. Even as AMBICO has gained its position in the global marketplace, owners, management, and staff remain well aware of the company's roots as a family-run business and the qualities that have propelled AMBICO to its current position as an industry-leading company. At AMBICO, each project is seen as an opportunity to achieve excellence. We invite you to be a part of our story.
